For children's playrooms or anyone else feeling adventurous, Bubble Cabinet Pull is an easy way to add texture to your display. **Designed & Crafted By Radically Talented Humans Right Here In The U.S. Of Awesome.**

## What's In The Box

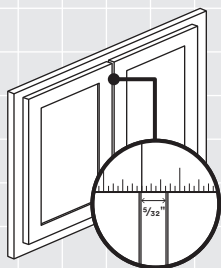

## What You'll Need

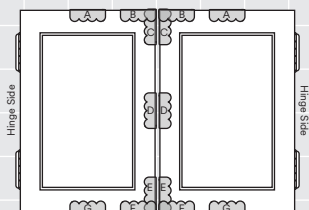

# Installation Steps

001

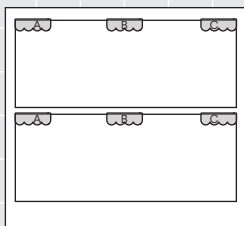

Let's go! First things first, make sure you have sufficient space for your Bubble Cabinet Pulls. Ensure that there is at least  $\frac{5}{32}$ " gap between cabinet doors where any adjacent pulls will be located.

002

Use your totally rad sense of design to find the best location for your Bubble Cabinet Pulls. If you are not sure, the illustration below shows suggested configurations. See **Rad Tip** ① on page 7 for additional help.

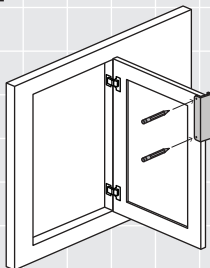

003

If you are using Bubble Cabinet Pulls as drawer pulls, below are some suggested configurations. Otherwise, skip to Step 4.

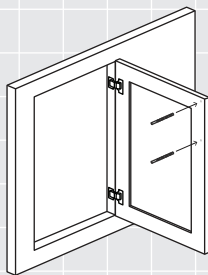

004

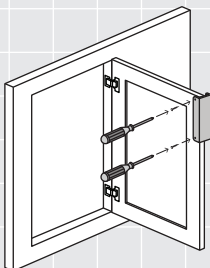

Position cabinet pull in desired location, hold in place and mark fastener holes with a pencil or fastener tip.

005

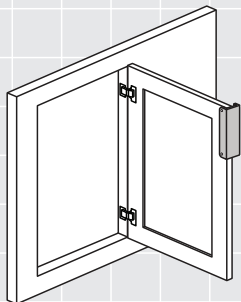

Drill a small pilot hole in the center of your mark with a #44 (.086") or smaller drill. To avoid accidental drill through, keep the pilot hole shallow. See **Rad Tip** Ⓜ on page 7.

006

Reposition your cabinet pull, and install cabinet fasteners with a Phillips head screw driver.

007

Stand back and relax, you did it! Give your cat a celebratory fist bump, if present.

How did we do? You'll get an email soon asking for a product review, and we'd be stoked if you oblige. You rock in advance!

## Warnings

### ① Correct Install Required For Safe Use

1.1 Cabinet Pulls must be correctly installed. Failure to do so may result in sagging cabinet pulls, falling objects, or serious injury. Please reference the Bubble Cabinet Pull Spec Sheet for more information.

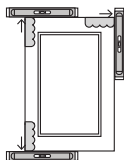

### ② California Proposition 65 Warning

2.1 This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Don't eat this cabinet pull. If you live outside of California, do whatever you want. For more boring information, visit [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov).

### ③ This Product May Make Others Incredibly Jealous

3.1 Any Shelfology Certified Rad™ product should be flaunted with caution around friends, loved ones, and even complete strangers, as minimal or extreme jealousy may occur. Shelf responsibly.

## ① Flush Mount Your Cabinet Pull

**1.1** To flush-mount your cabinet pull, place a level or a straight edge along the side of the door. Slide the cabinet pull into place until it touches the level. Hold in place and mark the screw hole locations.

## ② Avoid Drilling Too Deeply

**2.1** To avoid drilling too deeply, measure the thickness of your cabinet door. Wrap a piece of tape around your drill bit to mark a drilling depth at least  $\frac{1}{4}$ " less than the door thickness. Drill just until the tape reaches the surface. It may be helpful to remove the cabinet door to obtain accurate drilling.
