Wave Picture Ledge

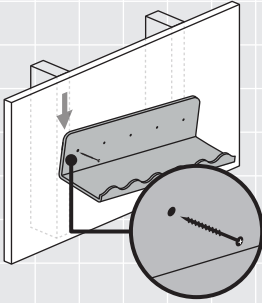

Install Guide

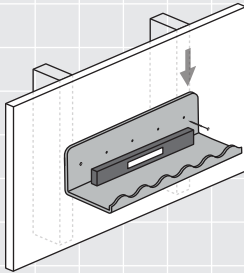

Installation Steps

001

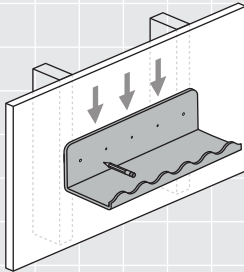

Woah! That's a wicked Wave Picture Ledge you have there! Position picture ledge on the wall with the pre-drilled holes along the top edge. Using a stud finder, align fastener holes with as many studs as possible. Use drill to fasten matching 1½" fastener in either far left or

002

Level the picture ledge and set second matching 1½" fastener in opposite end fastener hole with your drill. If the fastener holes miss an available stud, see **Rad Tip** ① on page 7. If you've already installed blocking behind the length of the backbar, skip to Step 5.

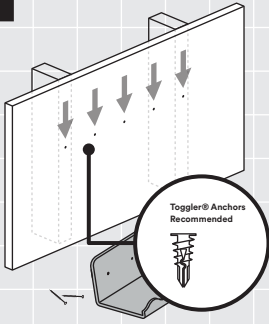

003

While the picture ledge is mounted to the wall, mark every remaining empty fastener hole with a pencil.

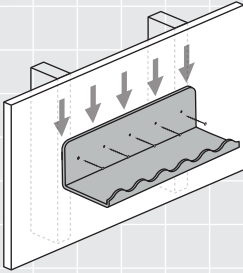

004

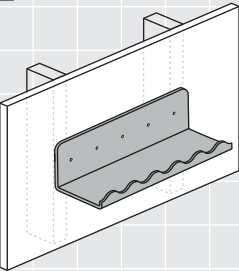

Remove the picture ledge from the wall to install wall anchors in each marked location that is not on a wall stud. Pre-drill each wall anchor location with ¼" drill bit to avoid breaking wall anchors.

005

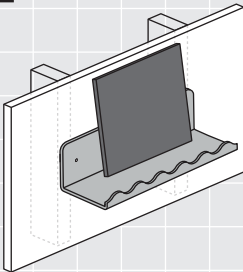

Replace the picture ledge. Drill matching 1½" fastener into each fastener hole.

006

Make final inspection of the picture ledge. Check for picture ledge sag, confirm the picture ledge is correctly secured to wall. If your picture ledge is sagging, refer to Rad Tip Ⓞ and Ⓟ.

007

Stand back and relax, you did it! Give your cat a celebratory fist bump, if present. Gently place your Kenny G vinyl collection on picture ledge and admire! If you need more help, please reach out to a shelf geek today.

How did we do? You'll get an email soon asking for a product review, and we'd be stoked if you oblige. You rock in advance!

Warnings

① **Correct Install Required For Safe Use**

1.1 Picture ledges must be correctly installed into studs or wall blocking. Failure to do so may result in sagging picture ledges, falling objects, or serious injury.

② **Adhere To The Capacity Rating Of Your Specific Picture Ledge**

2.1 Every Shelfology picture ledge length has been engineered for use with specific ledge capacities/ dimensions. Failure to follow our specified capacity ratings and correct picture ledge dimensions may result in sagging picture ledges, falling objects, or serious injury. Please reference the Wave Picture Ledge Spec Sheet for more information.

③ **California Proposition 65 Warning**

3.1 This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Don't eat this picture ledge. If you live outside of California, do whatever you want. For more boring information, visit www.p65warnings.ca.gov.

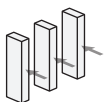

④ **This Product May Make Others Incredibly Jealous**

4.1 Any Shelfology Certified Rad™ product should be flaunted with caution around friends, loved ones, and even complete strangers, as minimal or extreme jealousy may occur. Shelf responsibly.

Rad Tips

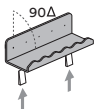

① Fasten Into All Studs & Blocking The Bracket Crosses

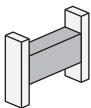

1.1 Studs are the vertical 2x4 boards that make up the bones of your walls. They provide solid structure for your picture ledge to attach to.

② Using Shims to Straighten Picture Ledge

2.1 If your wall is not straight, use shims to ensure your picture ledge is installed straight across the wall face and square to the wall.

1.2 Blocking is typically added later between studs in the wall for additional support to mount picture ledges to, and is usually made from 2x4 or 2x6 lumber.
